

# SARTHAK PATEL

Full-Stack Developer | React, Next.js, Node.js, TypeScript  
Indore, India | +91 7999925735 | sarthak.code30@gmail.com  
[linkedin.com/in/sarthak-patel-14938322a](https://www.linkedin.com/in/sarthak-patel-14938322a) | [github.com/sartha555k](https://github.com/sartha555k)

## EXPERIENCE

**Full Stack Developer Intern** | DigiFlex.ai, Indore Jun 2026 – Jul 2026

- Packaged shared React UI components as a private npm package so ongoing company projects use one component set instead of duplicating code.
- Added server-side rendering and route-level code splitting to the company's main Next.js application to reduce initial page-load time and improve Core Web Vitals.

**Full Stack Developer Intern** | Alphawizz Technologies, Indore Apr 2026 – Jun 2026

- Built the real-time order-tracking feature of the Oho delivery-management web app using WebSockets, pushing live driver status updates to customer and admin views.
- Set up shared Redux state across the Customer, Driver and Admin interfaces, cutting redundant re-renders on the client.
- Wrote typed, reusable UI components and fixed client-side rendering bottlenecks in the React front-end.

## PROJECTS

**Event-Driven Microservices Backend** | TypeScript, Express, NATS JetStream, Prisma, Zod, Docker Aug 2026

- Two services (user, notification) that communicate only through NATS JetStream events, with durable consumers, explicit acks, automatic retries and a dead-letter queue.
- Idempotency keys on every message so redeliveries never send a duplicate notification; correlation IDs injected at the API gateway and propagated through HTTP and NATS headers.

**MovieBook – Seat Booking with Redis Locking** | React, Redux Toolkit, Express, MongoDB, Redis, JWT Jun 2026

- Seat reservation with Redis locks: selected seats are held with a TTL during payment and released automatically on timeout, so two users cannot book the same seat.
- JWT authentication, showtime and seat-layout REST APIs, and a mock payment flow with persisted Redux state.

**Crack.AI – AI Mock Interviews** | MERN, FastAPI, Socket.IO, Whisper, Ollama, Monaco Editor May 2026

- Role-adaptive interview question generation across 18+ roles through a FastAPI service; per-session review and scoring.
- Audio endpoint that buffers user recordings for Whisper speech-to-text; Socket.IO keeps session state in sync and tab-switch detection flags integrity issues during live assessments.

**ResumeX – AI Resume Builder** | React, Redux Toolkit, Tailwind CSS, Node.js, Express, MongoDB, OpenAI API Dec 2025 – Mar 2026

- Resume builder with a live preview synced to form inputs through Redux Toolkit, multiple templates, export and public share links.
- OpenAI API drafts professional summaries and skill sections; backend stores document history and user sessions.

## TECHNICAL SKILLS

**Languages:** TypeScript, JavaScript, Python, C++, SQL, HTML, CSS

**Frontend:** React, Next.js, Redux Toolkit, Tailwind CSS, Vite

**Backend:** Node.js, Express, NestJS, FastAPI, REST APIs, WebSockets / Socket.IO, JWT authentication, Zod

**Data & messaging:** MongoDB, Mongoose, PostgreSQL, Redis, Prisma, NATS JetStream

**Tools:** Git, GitHub, Docker Compose, Vercel, AWS, Cursor, Claude, GitHub Copilot

**Concepts:** Data structures and algorithms, system design, OOP, DBMS, operating systems

## EDUCATION

**B.Tech, Information Technology** | Jabalpur Engineering College, Jabalpur | CGPA 7.8 / 10

**2021 – 2025**
